- AI-assisted workflows
- SEO fundamentals
- Google Workspace

SOFT SKILLS
- Collaboration
- Problem Solving
- Adaptability
- Attention to Detail

SUMMARY

UI/UX Designer with a strong interest in digital products, visual design and outdoor culture. I enjoy turning ideas and user needs into intuitive, engaging and visually consistent experiences, from early concepts and user flows to high-fidelity interfaces and prototypes. With a background in front-end development, I work comfortably in agile, international environments and collaborate closely with developers and product teams. I'm particularly motivated by brands that combine creativity, performance, community and action sports.

PROFESSIONAL EXPERIENCE

IronCat - UI / UX Design & Web Developer
Vilnius, Lithuania · April 2026 – July 2026
- Designed user-centered interfaces, wireframes and high-fidelity screens in Figma for digital products.
- Translated functional requirements and technical constraints into clear, intuitive user experiences.
- Designed and improved responsive web interfaces using HTML, CSS and JavaScript.
- Collaborated with developers throughout the design and implementation process to ensure feasibility and consistency.
- Contributed to the UX and development of an interactive VR movie platform using Unreal Engine 5.
- Performed functional reviews and iterations to improve usability and overall product experience.
- Worked in an international Agile environment and used AI-assisted tools to support design and development workflows.

Freelance — UI/UX Designer & Web Developer
June 2025 - Present
- Analyze client needs, business objectives, target audiences, technical constraints and brand requirements.
- Translate requirements into intuitive user flows and digital experiences for websites, applications and e-commerce projects.
- Create wireframes, responsive layouts and high-fidelity UI designs in Figma.
- Define or extend visual identities and reusable design components to ensure consistency across interfaces.
- Present design solutions, gather client feedback and iterate the project lifecycle.
- Develop responsive websites and translate designs into functional interfaces using front-end technologies.
- Manage projects independently from initial requirements and planning through revisions and final delivery.
- Advise clients on usability, web performance and digital best practices.

Sud Trading Company — Front-End Angular Developer
Montpellier, France · December 2024 - January 2025
- Supported the development and maintenance of an Angular web application.
- Improved existing UI components and usability.
- Performed functional testing and documented issues for the development team.

Chromateq — Technical Support Technician
Montpellier, France · July 2023 – January 2024
- Tested software and hardware before release and identified technical issues.
- Provided technical support and diagnostics to clients.
- Delivered product and software training and maintained technical documentation.

SELECTED DESIGN PROJECTS

LAY — Final-Year Game & Level Design Project
Game & Level Design · UX · Gameplay Testing · Unreal Engine
June 2021 – June 2022
- Designed gameplay mechanics, level structures, puzzle flows and player progression.
- Conducted gameplay testing and iterated on levels and mechanics to improve clarity, progression and player experience.
- Conceptualized and implemented selected gameplay features using Unreal Engine Blueprint.
- Collaborated throughout the production process to identify issues, test solutions and refine the overall player experience.

Rewind — Personal Product Design Project · *In Progress*
Mobile Product Design · UX/UI · Design System
- Designing an end-to-end mobile experience for discovering, tracking and rating movies and TV shows.
- Creating the information architecture, user flows and high-fidelity interfaces across key product journeys.
- Building reusable components and a scalable design system to ensure consistency across the product.

Startup Redesign — Freelance UX/UI Project
UX/UI · Design System · Figma · Responsive Design
- Redesigned digital interfaces with a focus on usability, visual consistency and responsive behavior.
- Created reusable Figma components and structured design system elements.
- Delivered polished high-fidelity interfaces adapted across screen sizes.

Cook Better — UX/UI Design Project
UX/UI · Responsive Design · Figma
- Designed a responsive digital experience focused on clear navigation and intuitive access to content.
- Developed the experience from UX structure and wireframes to high-fidelity responsive interfaces.
- Created a consistent visual system and reusable UI elements in Figma.

E-commerce Store — Personal Project
UX/UI · Shopify · Branding · E-commerce · SEO
June 2022 – June 2023
- Designed and built a Shopify e-commerce experience, including site structure, navigation, product pages and responsive interfaces.
- Created the visual identity and optimized the customer journey, CTAs and on-page SEO.
